

TEAM AGILITY ASSESSMENT

The Team Agility assessment can be applied to highlight an individual and how she/he personality brings leverage to a team. When the entire team completes their assessments, all members can identify how their personality compliments the entire team reaching higher performances.

After completing the assessment and learning how to communicate to others, improvements were easily found, and the performance was greatly improved. Increased communication between the operations and maintenance staff resulted in 22% efficiency of the work orders being planned and executed.

THE AGILE MODEL®

The Agile Model® consists of five drivers. Individuals are assessed on 15 key behaviors.

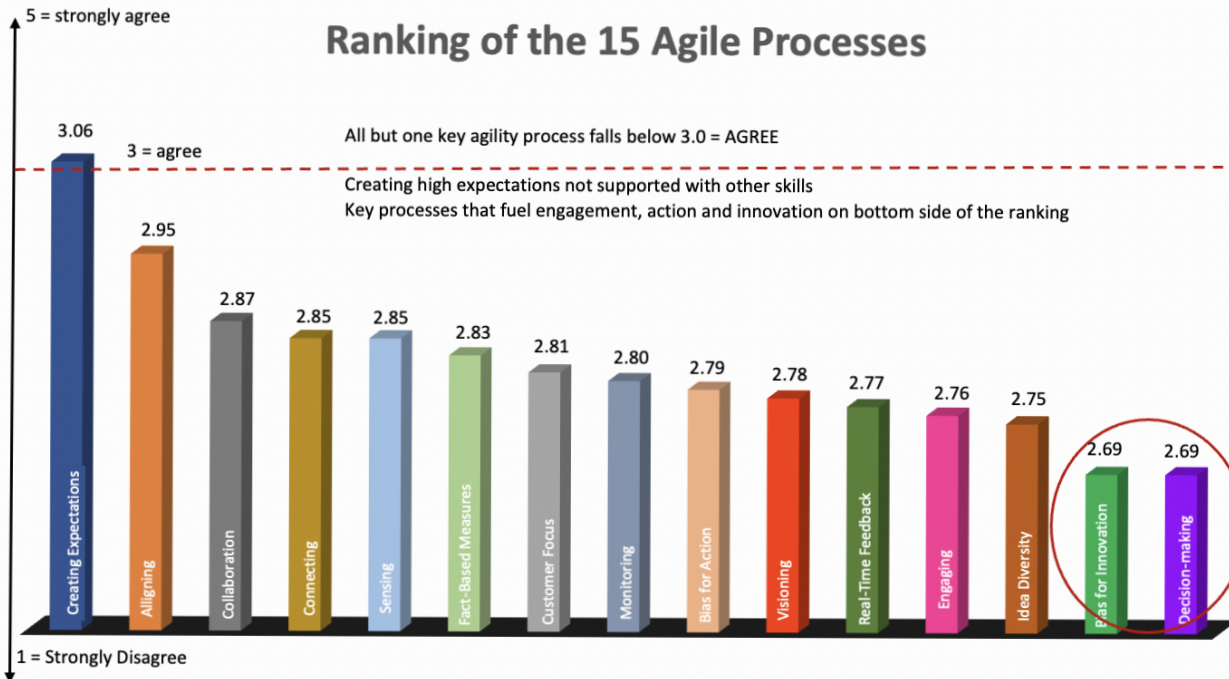

- Anticipating Change:** Requires effective processes for Visioning, Sensing and Monitoring
- Generating Confidence:** Requires effective processes for Connecting, Aligning and Engaging
- Initiating Action:** Requires effective processes for Bias for Action, Decision-Making Capability and Collaborating
- Liberating Thinking:** Requires effective processes for Bias for Innovation, Focusing on Customers and Idea Diversity
- Evaluating Results:** Requires processes for Creating Expectations, Real-Time Feedback and Fact-Based Measures

Our expertise is to provide **INSIGHTS & GUIDANCE** to improve your business results.

We serve as the catalyst to help leaders and teams

- Think differently
- Prepare differently
- Execute differently
